PLANT SCIENCE

Subject index

Volume 96 (1994)

Acyltransferase, lipid biosynthesis, oleate selectivity, periplasm, *Pisum sativum* L., recombinant protein, 45
Agrobacterium tumefaciens, *Stylosanthes guianensis*, regeneration, transgenic plants, 119
Agrobacterium tumefaciens, transformation, rapid cycling cabbage, chimerism, 223
Agrobacterium-mediated transformation, gene expression, *Bacillus thuringiensis*, insect-resistant plants, Indianmeal moth, codling moth, navel orangeworm, 151
Antioxidants, free radicals, glutathione, *Hordeum vulgare*, oxidative stress, SO_2 fumigation, 31
Apical dominance, apical meristem, 5-azacytidine, *Chenopodium rubrum*, flowering, growth correlations, 211
Apical meristem, apical dominance, 5-azacytidine, *Chenopodium rubrum*, flowering, growth correlations, 211
Arabidopsis thaliana, *Catharanthus roseus*, cytochrome P450, transgenic expression, tobacco, 129
Auxins, *Prunus amygdalus*, *Prunus dulcis*, in vitro, darkness, 163
5-Azacytidine, apical meristem, apical dominance, *Chenopodium rubrum*, flowering, growth correlations, 211

Bacillus thuringiensis, *Agrobacterium*-mediated transformation, gene expression, insect-resistant plants, Indianmeal moth, codling moth, navel orangeworm, 151
Barley, wheat, electroporation, PEG-mediated DNA uptake, transient expression, protoplasts, 179
Berberine, *Coscinium fenestratum*, cell suspension culture, tetrahydroberberine oxidase, 217
Berberis parvifolia, ultrastructure, root meristematic cells, small vesicles, cell cultures, protoberberine alkaloids, 143
Biological X-ray microanalysis, *Camellia japonica*, embryogenesis, Ca^{2+}, cell competence, polarity, 189

Ca^{2+}, *Camellia japonica*, embryogenesis, biological X-ray microanalysis, cell competence, polarity, 189
Ca^{2+}, *Tricitum aestivum*, *Glycine max*, protease inhibitor, protein kinase, 69
Callus, *Cucumis melo*, root culture, organogenesis, nodule formation, shoot regeneration, 137
Camellia japonica, embryogenesis, Ca^{2+}, biological X-ray microanalysis, cell competence, polarity, 189
Capsicum annuum, chili pepper, *Larrea tridentata*, creosote bush, drought tolerance, cell cultures, 21
Catalase, flooding, *Nicotiana tabacum*, senescence, superoxide dismutase, 41
Catharanthus roseus, cytochrome P450, transgenic expression, tobacco, *Arabidopsis thaliana*, 129
Cell competence, *Camellia japonica*, embryogenesis, Ca^{2+}, biological X-ray microanalysis, polarity, 189
Cell cultures, *Berberis parvifolia*, ultrastructure, root meristematic cells, small vesicles, protoberberine alkaloids, 143
Cell cultures, *Capsicum annuum*, chili pepper, *Larrea tridentata*, creosote bush, drought tolerance, 21
Cell membranes, proton transport, H^+-ATPase, roots, *Zea mays* L., 55
Cell suspension culture, *Coscinium fenestratum*, berberine, tetrahydroberberine oxidase, 217
Cell wall proteins, structural proteins, developmental regulation, water-stress inducible, 87
Chenopodium rubrum, 5-azacytidine, apical meristem, apical dominance, flowering, growth correlations, 211
Chili pepper, *Capsicum annuum*, *Larrea tridentata*, creosote bush, drought tolerance, cell cultures, 21
Chimerism, transformation, *Agrobacterium tumefaciens*, rapid cycling cabbage, 223
Codling moth, *Agrobacterium*-mediated transformation, gene expression, *Bacillus thuringiensis*, insect-resistant plants, Indianmeal moth, navel orangeworm, 151
Coscinium fenestratum, cell suspension culture, berberine, tetrahydroberberine oxidase, 217
Creosote bush, *Capsicum annuum*, chili pepper, *Larrea tridentata*, drought tolerance, cell cultures, 21
Cucumis melo, root culture, organogenesis, callus, nodule formation, shoot regeneration, 137
Cytochrome P450, *Catharanthus roseus*, transgenic expression, tobacco, *Arabidopsis thaliana*, 129

Darkness, *Prunus amygdalus*, *Prunus dulcis*, in vitro, auxins, 163
Defense reaction, fungal elicitor, GTP-binding protein, potato tuber, signal transduction, 81

Developmental regulation, cell wall proteins, structural proteins, water-stress inducible, 87
Drought tolerance, *Capsicum annuum*, chili pepper, *Larrea tridentata*, creosote bush, cell cultures, 21

Electroporation, barley, wheat, PEG-mediated DNA uptake, transient expression, protoplasts, 179
Embryogenesis, *Camellia japonica*, Ca^{2+}, biological X-ray microanalysis, cell competence, polarity, 189

Flooding, catalase, *Nicotiana tabacum*, senescence, superoxide dismutase, 41
Flowering, *Chenopodium rubrum*, 5-azacytidine, apical meristem, apical dominance, growth correlations, 211
Free radicals, antioxidants, glutathione, *Hordeum vulgare*, oxidative stress, SO_2 fumigation, 31
Fungal elicitor, defense reaction, GTP-binding protein, potato tuber, signal transduction, 81

Gene expression, *Agrobacterium*-mediated transformation, *Bacillus thuringiensis*, insect-resistant plants, Indianmeal moth, codling moth, navel orangeworm, 151
Germination, *Glycine max*, lipoxygenase, methyl jasmonate, vegetative storage protein, 109
Germination, *Vitis vinifera*, somatic embryo, reserve products, isocitrate lyase, malate synthase, 167
Glutathione, antioxidants, free radicals, *Hordeum vulgare*, oxidative stress, SO_2 fumigation, 31
Glycine max, *Tricitum aestivum*, protease inhibitor, protein kinase, Ca^{2+}, 69
Glycine max, lipoxygenase, methyl jasmonate, germination, vegetative storage protein, 109
Growth correlations, flowering, *Chenopodium rubrum*, 5-azacytidine, apical meristem, apical dominance, 211
GTP-binding protein, defense reaction, fungal elicitor, potato tuber, signal transduction, 81

H^+-ATPase, proton transport, cell membranes, roots, *Zea mays* L., 55
Hordeum vulgare, antioxidants, free radicals, glutathione, oxidative stress, SO_2 fumigation, 31

In vitro, *Prunus amygdalus*, *Prunus dulcis*, darkness, auxins, 163
Indianmeal moth, *Agrobacterium*-mediated transformation, gene expression, *Bacillus thuringiensis*, insect-resistant plants, codling moth, navel orangeworm, 151
Insect-resistant plants, *Agrobacterium*-mediated transformation, gene expression, *Bacillus thuringiensis*, Indianmeal moth, codling moth, navel orangeworm, 151
Isocitrate lyase, *Vitis vinifera*, somatic embryo, reserve products, malate synthase, germination, 167

Larrea tridentata, *Capsicum annuum*, chili pepper, creosote bush, drought tolerance, cell cultures, 21
Lipid biosynthesis, acyltransferase, oleate selectivity, periplasm, *Pisum sativum* L., recombinant protein, 45
Lipoxygenase, *Glycine max*, methyl jasmonate, germination, vegetative storage protein, 109

Maize, photoacoustic spectroscopy, photosynthesis, open photoacoustic cell, oxygen evolution, *Zea mays* L., 203
Malate synthase, *Vitis vinifera*, somatic embryo, reserve products, isocitrate lyase, germination, 167
Methyl jasmonate, *Glycine max*, lipoxygenase, germination, vegetative storage protein, 109
mRNA, ribonucleoprotein particles, small RNA, translation initiation complex, wheat embryos, 99

Navel orangeworm, *Agrobacterium*-mediated transformation, gene expression, *Bacillus thuringiensis*, insect-resistant plants, Indianmeal moth, codling moth, 151
Nicotiana tabacum, catalase, flooding, senescence, superoxide dismutase, 41
Nodule formation, *Cucumis melo*, root culture, organogenesis, callus, shoot regeneration, 137

Oleate selectivity, acyltransferase, lipid biosynthesis, periplasm, *Pisum sativum* L., recombinant protein, 45
Open photoacoustic cell, photoacoustic spectroscopy, photosynthesis, oxygen evolution, maize, *Zea mays* L., 203
Organogenesis, *Cucumis melo*, root culture, callus, nodule formation, shoot regeneration, 137
Oxidative stress, antioxidants, free radicals, glutathione, *Hordeum vulgare*, SO_2 fumigation, 31
Oxygen evolution, photoacoustic spectroscopy, photosynthesis, open photoacoustic cell, maize, *Zea mays* L., 203

PEG-mediated DNA uptake, barley, wheat, electroporation, transient expression, protoplasts, 179
Periplasm, acyltransferase, lipid biosynthesis, oleate selectivity, *Pisum sativum* L., recombinant protein, 45
Peroxidase isozymes, Zn treatment, seedling growth, 1
Photoacoustic spectroscopy, photosynthesis, open photoacoustic cell, oxygen evolution, maize, *Zea mays* L., 203
Photosynthesis, photoacoustic spectroscopy, open photoacoustic cell, oxygen evolution, maize, *Zea mays* L., 203
Pisum sativum L., acyltransferase, lipid biosynthesis, oleate selectivity, periplasm, recombinant protein, 45
Polarity, *Camellia japonica*, embryogenesis, Ca^{2+}, biological X-ray microanalysis, cell competence, 189
Potato tuber, defense reaction, fungal elicitor, GTP-binding protein, signal transduction, 81
Protease inhibitor, *Tricitum aestivum*, *Glycine max*, protein kinase, Ca^{2+}, 69
Protein kinase, *Tricitum aestivum*, *Glycine max*, protease inhibitor, Ca^{2+}, 69
Protoberberine alkaloids, *Berberis parvifolia*, ultrastructure, root meristematic cells, small vesicles, cell cultures, 143
Proton transport, H^+-ATPase, cell membranes, roots, *Zea mays* L., 55
Protoplasts, barley, wheat, electroporation, PEG-mediated DNA uptake, transient expression, 179
Prunus amygdalus, *Prunus dulcis*, in vitro, darkness, auxins, 163
Prunus dulcis, *Prunus amygdalus*, in vitro, darkness, auxins, 163

Rapid cycling cabbage, transformation, *Agrobacterium tumefaciens*, chimerism, 223

Recombinant protein, acyltransferase, lipid biosynthesis, oleate selectivity, periplasm, *Pisum sativum* L., 45
Regeneration, *Stylosanthes guianensis*, transgenic plants, *Agrobacterium tumefaciens*, 119
Reserve products, *Vitis vinifera*, somatic embryo, isocitrate lyase, malate synthase, germination, 167
Ribonucleoprotein particles, mRNA, small RNA, translation initiation complex, wheat embryos, 99
Root culture, *Cucumis melo*, organogenesis, callus, nodule formation, shoot regeneration, 137
Root meristematic cells, *Berberis parvifolia*, ultrastructure, small vesicles, cell cultures, protoberberine alkaloids, 143
Roots, proton transport, H^+-ATPase, cell membranes, *Zea mays* L., 55

Seedling growth, Zn treatment, peroxidase isozymes, 1
Senescence, catalase, flooding, *Nicotiana tabacum*, superoxide dismutase, 41
Shoot regeneration, *Cucumis melo*, root culture, organogenesis, callus, nodule formation, 137
Signal transduction, defense reaction, fungal elicitor, GTP-binding protein, potato tuber, 81
Small RNA, ribonucleoprotein particles, mRNA, translation initiation complex, wheat embryos, 99
Small vesicles, *Berberis parvifolia*, ultrastructure, root meristematic cells, cell cultures, protoberberine alkaloids, 143
SO_2 fumigation, antioxidants, free radicals, glutathione, *Hordeum vulgare*, oxidative stress, 31
Somatic embryo, *Vitis vinifera*, reserve products, isocitrate lyase, malate synthase, germination, 167
Structural proteins, cell wall proteins, developmental regulation, water-stress inducible, 87
Stylosanthes guianensis, regeneration, transgenic plants, *Agrobacterium tumefaciens*, 119
Sucrose synthesis, sucrose-6-phosphate, sucrose-phosphate synthase, 15
Sucrose-6-phosphate, sucrose synthesis, sucrose-phosphate synthase, 15
Sucrose-phosphate synthase, sucrose synthesis, sucrose-6-phosphate, 15
Superoxide dismutase, catalase, flooding, *Nicotiana tabacum*, senescence, 41

Tetrahydroberberine oxidase, *Coscinium fenestratum*, cell suspension culture, berberine, 217
Tobacco, *Catharanthus roseus*, cytochrome P450, transgenic expression, *Arabidopsis thaliana*, 129
Transformation, *Agrobacterium tumefaciens*, rapid cycling cabbage, chimerism, 223
Transgenic expression, *Catharanthus roseus*, cytochrome P450, tobacco, *Arabidopsis thaliana*, 129
Transgenic plants, *Stylosanthes guianensis*, regeneration, *Agrobacterium tumefaciens*, 119
Transient expression, barley, wheat, electroporation, PEG-mediated DNA uptake, protoplasts, 179
Translation initiation complex, ribonucleoprotein particles, mRNA, small RNA, wheat embryos, 99
Tricitum aestivum, *Glycine max*, protease inhibitor, protein kinase, Ca^{2+}, 69

Ultrastructure, *Berberis parvifolia*, root meristematic cells, small vesicles, cell cultures, protoberberine alkaloids, 143

Vegetative storage protein, *Glycine max*, lipoxygenase, methyl jasmonate, germination, 109
Vitis vinifera, somatic embryo, reserve products, isocitrate lyase, malate synthase, germination, 167
Water-stress inducible, cell wall proteins, structural proteins, developmental regulation, 87

Wheat embryos, ribonucleoprotein particles, mRNA, small RNA, translation initiation complex, 99
Wheat, barley, electroporation, PEG-mediated DNA uptake, transient expression, protoplasts, 179

Zea mays L., photoacoustic spectroscopy, photosynthesis, open photoacoustic cell, oxygen evolution, maize, 203
Zea mays L., proton transport, H^+-ATPase, cell membranes, roots, 55
Zn treatment, seedling growth, peroxidase isozymes, 1
